“ As an Engineering student under Bill at Brainerd Jr College in 1970 through 1971 and in 1975, he was the most memorable and talented person I had ever met. He loved teaching, loved his students and was always looking for new seminars he could take during the summers, giving us a day off to celebrate his finding a fitting seminar. I remember a story about him while he was living on Round Lake. He would go out in his small boat and read. The neighbors gave him a hard time so he started taking fishing gear with him while continuing his reading. One of my heros.

“ Looking to see if Bill was still alive. Seeing this, I simply want to share our belated condolences from Brainerd Community College (now Central Lakes College). He hired me in 1975 when he was president there. I retired 11 years ago after having taught there for 38 years. I will pass along this information to colleagues he knew. Larry M. Kellerman, CLC librarian, retired.
